

EXAMPLE: 1 DAY-teff EDUCATHON STRUCTURE & TIMELINE

PLEASE NOTE

The time spent on individual tasks highly depends on

- **the nature of your group and teams:** Are they teachers, students, pupils, ...? Will some teams need more / less support / time than others?
- **the total number of participants:** How many pitches will there be in the end? How many teams need to be supervised?
- **whether the Educathon is on-site, online or hybrid:** Will you need a team-finding activity at the beginning or are the teams already set? Will the participants need to go somewhere else for the team work and return to a main area (e.g. a classroom) for the checkpoints? How big/small is the setting for the pitch presentations?
- **and many other factors!**
